## Label Cyber Compliance – Security 2023 – Licensed Auditor

The main objective of this training is to enable participants to become competent and approved auditors for the Cyber Conformity - Security 2023 label. By achieving this operational objective, auditors will be able to assess companies' compliance with the label's requirements, to identify security gaps, and to propose constructive recommendations to help them achieve and maintain their label.

### Public & prerequisites

**Prerequisites** : Basic knowledge of IT and cybersecurity, privacy laws (GDPR and LPD), communication skills, and a good understanding of auditing principles. Professional experience in IT, auditing or risk management is also recommended.

**Public** : Auditor wishing to work in a new field of activity, IT professional retraining for work or on his own, young graduate looking for a job in a booming sector.

### Educational, technical & human resources

The training takes place synchronous distance learning via a secure personal space. This 100% digital environment provides participants with:

- Course material, PowerPoint presentation, exam preparation
- Case studies, exercises, audit tool, formative assessments
- Group discussions and Q&A sessions
- Feed-back from trainers

The training is provided by cybersecurity expert, certified under the Cyber Compliance – Security 2023 label.

## [ Examination procedures ]

### Examination procedures

Within a maximum of 90 days after the end of the training course, and using the resources provided, an audit file is to be completed and submitted on the personal space. You will then be automatically registered, without any action on your part and in chronological order of submission, for the next validation exam session.

Twice a month, our jury meets to study the files and validate or reject the exam. If you pass, you'll receive your certificate by email, and if you fail, you'll have the chance to retake the exam once free of charge
